Plus/Non-Index Sectors (%)	0 – 20

OUR STRENGTHS

Our Corporate Fixed Income Strategy seeks to deliver strong risk adjusted returns over multiple market cycles with top decile performance.

We believe our key competitive strengths are:

Investment Style — Portfolio Managers, research analysts and traders work together; focused primarily on security selection within a duration neutral portfolio.

Size — Our size helps ensure sufficient diversification at the portfolio level, while being able to source new issue allocations, participate in smaller deals, and remain sufficiently nimble to reposition the portfolio as market opportunities arise.

Experience — Our deep credit experience helps enable us to navigate various market cycles, looking for any market dislocations and exercising an appropriate sell discipline.

PHILOSOPHY AND PROCESS

We believe fixed income markets are efficient with respect to interest rate risk, but regularly misprice securities that are exposed to credit, downgrade and liquidity risks.

We seek to exploit inefficiencies in the market and provide clients with excess returns to the benchmark without incurring undue risk through:

- Conducting proprietary, in-depth fundamental research
- Targeting duration-neutral portfolios
- Constructing portfolios with attractive risk / reward characteristics

ALPHA DRIVERS

- Focus on idiosyncratic security selection to drive alpha
- We do not put a large emphasis on macro bets, such as duration and term structure
- Willing to invest in off-the-run bonds and allow our credit research team to take a deeper dive to identify value
- Emphasize specific characteristics of an issuer, industry consolidation, downgrades and upgrades, improving fundamentals, and identifiable potential catalysts
- Believe in the ability to turn the portfolio over to source new ideas at attractive levels and aim to exit positions with rich valuations

1. Stated at estimated fair value (unaudited). Intermediate Corporate Fixed Income is a strategy of public fixed income assets. Total Strategy Assets for Intermediate Corporate Fixed Income include all assets managed by MIM in the Intermediate Corporate Fixed Income strategy and may include certain assets that are not included in Composite Assets (as presented in GIPS® Composite Statistics and Performance table on the following page) for Intermediate Corporate Fixed Income.
2. Please see the full GIPS® disclosures at the end of this document.
3. Any portfolio targets and/or limits are used to illustrate the Investment Manager's current intentions and may be subject to change without notice.

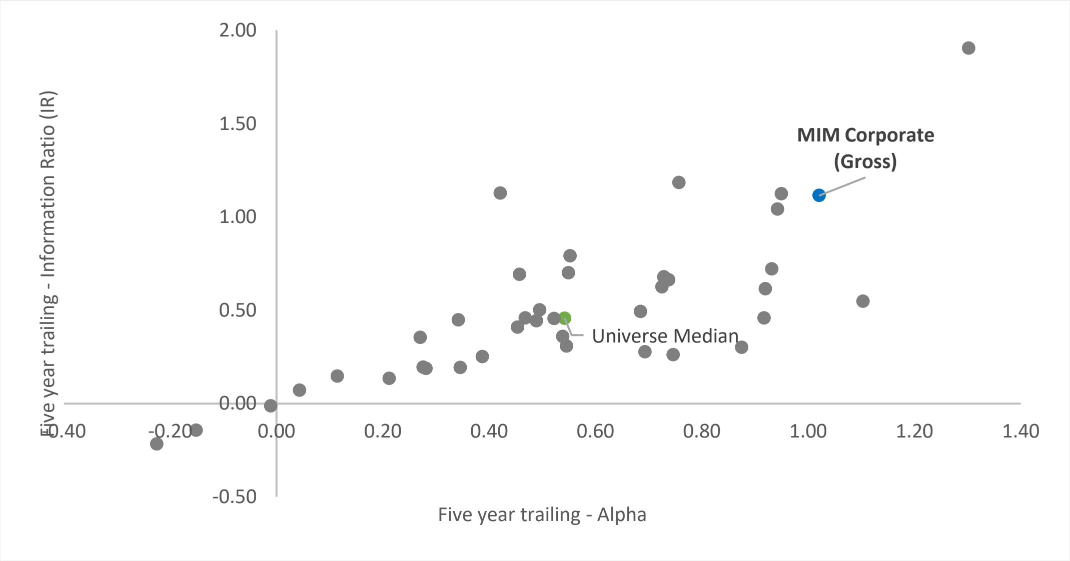
5 YEAR TRAILING ALPHA & INFORMATION RATIO[2]



Information Ratio (IR)	
Corporate Fixed Income (Gross)	**1.11**
Corporate Fixed Income (Net)	**0.73**
Universe Median (Gross)[2]	0.46

Alpha	
Corporate Fixed Income (Gross)	**1.02**
Corporate Fixed Income (Net)	**0.66**
Universe Median (Gross)[2]	0.54

1. Past performance is not indicative of future results. Net of fee returns reflect the deduction of investment advisory fees and are calculated in the same manner as gross of fee returns. Net of fee returns are calculated using the highest fee rate disclosed in the Form ADV. Fees for separate accounts may be negotiable depending upon asset size and type of account. For additional benchmark disclosure, please see the GIPS® disclosures at the end of this presentation. Tracking error is calculated by subtracting the return of a specified benchmark from the manager's return for each period and then calculating the standard deviation of those differences. Information ratio is the return of the portfolio minus the return of the benchmark divided by tracking error.
2. The eVestment Universe ranking is calculated by eVestment using investment performance returns gross of fees and strategy descriptions self-reported by participating investment managers and are not are not verified or guaranteed by eVestment. eVestment defines each Universe and selects the participating managers for the Universe it determines have similar investment strategies. The Universe ranking uses gross performance as manager fees may vary so that returns will be reduced when advisory fees are deducted. Performance returns for periods greater than one year are annualized. Additional information regarding net performance rankings is available upon request. The reports of the Universe percentile ranks were sourced on October 25, 2022, and represent 79% of the reported eVestment Corporate Fixed Income Universe as of that date. MIM has not verified and cannot verify the information from outside sources. eVestment calculates Alpha by subtracting the return of a specified benchmark from the manager's return and Information Ratio by subtracting the return of the benchmark from the return of the portfolio divided by tracking error.

QUARTERLY PERFORMANCE ATTRIBUTION

- Relative underperformance came from both sector allocation and security selection.
- An allocation to US Treasuries detracted from relative performance amid spread volatility.
- In Financials, our underweight to the Banking sector drove modest outperformance at the sector level. Banks were frequent issuers during the quarter and the generous concessions at which these deals were priced weighed on spreads. An overweight to Finance Companies was positive. On the flipside, a Canadian asset management firm underperformed in Brokerage/Asset Management/ Exchanges as the company had weak second quarter earnings.
- Communications was the greatest detractor within the Industrials sector. A company in Media and Entertainment continued to struggle post-merger. Cable and Satellite underperformed as competition from fixed wireless providers continued to pressure the cable broadband sector. In Wirelines, macro pressures caused a large telecom company to cut forward guidance.
- Consumer Non-Cyclicals detracted during the quarter, led by the overweight to an emerging market name in Food & Beverage. A general underweight in Health Care detracted.
- In Energy, relative underperformance came from Emerging Market companies in Oil Field Services and Integrated Energy. Independent Energy names detracted as oil prices declined 25% during the quarter.
- In Technology, security selection was negative. However, underweights to high quality names partially offset.
- In Utilities, shorter-dated paper and positioning within Electrics detracted from relative returns.
- The allocation to High Yield detracted. A Financial name drove underperformance following deteriorating credit fundamentals and a downgrade in August.

STRATEGY

One area of the market we feel comfortable adding to right now is short-dated credit. Flatter rate and spread curves have created extremely attractive opportunities to allocate capital in a maturity window in which we believe we can get very comfortable with the trajectory of the balance sheet. We believe we can structure portfolios to continue to add some yield advantage to the portfolio (at the expense of cash and Treasuries) while still maintaining a generally conservative risk posture until valuations cheapen further. Away from these front-end opportunities, we are intensely focused on the fundamental outlooks for the credits in which we are invested, and their ability to generate attractive risk adjusted returns in the context of a recessionary environment. To the extent that we can identify better opportunities, we are going to reposition into those more resilient credits. We will also continue to be active in the new issue market. Primary issuance has slowed dramatically as many issuers are waiting for calmer conditions, but elevated volatility has resulted in elevated concessions that offers us an opportunity to allocate to liquid credit at attractive valuations. Liquidity is valuable in this market, and so any tactical trading opportunities will likely be concentrated in the primary market, whereas we recognize that relative value trades into less liquid curve points will take longer to monetize.

1. The characteristics displayed are for a representative account for this investment strategy. Actual account characteristics may differ. The benchmark data is that of the Bloomberg U.S. Intermediate Corporate Index and the Bloomberg Intermediate Credit Index. All data above is provided for illustrative purposes only. This data is supplemental to the information required in a GIPS® compliant document. Credit ratings reflect the index provider's credit quality methodology. Average quality excludes cash and securities that are not rated. Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. Where the rating agencies rate a security differently, MIM follows the index provider ratings methodology middle of three, lower of two. A portion of the portfolio's securities may not be rated. Breakdown is not an S&P credit rating or an opinion of S&P as to the creditworthiness of such portfolio. Totals may not foot due to rounding.

Past performance is not indicative of future results. The information presented is only available for institutional client use.

1. There are two performance benchmarks for the Intermediate Corporate Fixed Income composite: the Bloomberg U.S. Intermediate Corporate Investment Grade Index (Intermediate Corporate Index) and the Bloomberg U.S. Credit Intermediate Index (Intermediate Credit Index). The Intermediate Corporate Index is a broad based index that measures all publicly issued, fixed rate, nonconvertible, investment grade, corporate debt with less than 10 years to maturity. Issues have specific rating requirements and must be rated investment grade (Baa3/BBB- or higher) by two of Moody's, Fitch or S&P. The Intermediate Credit Index measures the performance of investment grade, US dollar-denominated, fixed-rate, taxable corporate and government-related debt with less than ten years to maturity. It is composed of a corporate and a non-corporate component that includes non-US agencies, sovereigns, supranationals and local authorities.
2. The dispersion of annual returns is measured by the standard deviation among asset-weighted gross of fee portfolio returns represented in the composite for the full year. "N/A" is an indication that the information is not statistically meaningful due to an insufficient number of portfolios (five or fewer) in the composite for the entire year. Standard deviation is only presented for accounts managed for a full calendar year.
3. The three-year annualized standard deviation measures the variability of the gross of fee composite and the benchmark returns over the preceding 36 month period. The standard deviation is not presented for 2000 through 2010 because it is not required for periods prior to 2011. It is also not presented for quarter-ends.
4. Prior to July 1, 2019, the investment team was part of a prior firm. Therefore, "Total Firm Assets (BB)" is left blank for year ends before the team joined MetLife Investment Management.

For purposes of the Global Investment Performance Standards ("GIPS") compliance, the "Firm" is defined as MetLife Investment Management ("MIM"). MIM is MetLife, Inc.'s institutional investment management business. The Firm is defined to include all accounts captured in MetLife's Assets Under Management. On September 15, 2017, MetLife, Inc. ("MetLife") acquired Logan Circle Partners ("LCP") and the Firm was redefined as of July 1, 2019 to include LCP in the MIM assets.

MetLife Investment Management claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. MetLife Investment Management has been independently verified for periods **January 1, 2011 through December 31, 2020**. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Intermediate Corporate Fixed Income composite has had a performance examination for the periods **July 1, 2013 through December 31, 2020**. The verification and performance examination reports are available upon request.

The creation date of the Intermediate Fixed Income ("Intermediate") composite is April 13, 2015 and the inception date is July 1, 2013. Prior to July 1, 2019, the performance of the composite represents the performance that occurred while members of the management team were affiliated with a prior firm. The composite has been examined for the periods July 1, 2013 to June 30, 2019 while at another firm. The prior firm, LCP, was verified for the periods November 1, 2007 to June 30, 2019. The verification and performance examination reports are available upon request.

The Intermediate Corporate strategy seeks to outperform the benchmark by investing in high quality fixed income securities across the government, corporate and structured markets, with a target duration of approximately 4 years. The Intermediate Corporate composite includes all fee-paying portfolios managed on a discretionary basis according to the applicable composite strategy except as otherwise excluded herein. The Firm maintains a list of composites and descriptions, a list of limited distribution pooled funds and their descriptions, and a list of broad distribution pooled funds, all of which are available upon request. Policies for valuing investments, calculating performance and preparing GIPS reports are available upon request.

There are two performance benchmarks for the Intermediate Corporate Fixed Income composite: the Bloomberg U.S. Intermediate Corporate Investment Grade Index (Intermediate Corporate Index) and the Bloomberg U.S. Credit Intermediate Index (Intermediate Credit Index). The Intermediate Corporate Index is a broad based index that measures all publicly issued, fixed rate, nonconvertible, investment grade, corporate debt with less than 10 years to maturity. Issues have specific rating requirements and must be rated investment grade (Baa3/BBB- or higher) by two of Moody's, Fitch or S&P. The Intermediate Credit Index measures the performance of investment grade, US dollar-denominated, fixed-rate, taxable corporate and government-related debt with less than ten years to maturity. It is composed of a corporate and a non-corporate component that includes non-US agencies, sovereigns, supranationals and local authorities. The Intermediate Credit Index was added as a secondary benchmark on January 1, 2022. It is not possible to invest directly in an unmanaged index. All index returns presented are provided to represent the investment environment existing during the time periods shown and will not be covered by the future report of independent verifiers. For comparison purposes, the index is fully invested and includes the reinvestment of income. The returns for the index do not include any transaction costs, management fees or other costs.

Returns are based on fully discretionary accounts under management and may include terminated accounts. The dispersion of annual returns is measured by the standard deviation among asset-weighted gross of fee portfolio returns represented within the composite for the full year. Dispersion is not calculated for composites with five or fewer accounts for the whole period.

Performance returns are presented gross and net of fees and include the reinvestment of all income and are calculated in U.S. dollars. Dividend income has been recorded net of all applicable foreign withholding taxes. Returns calculated gross of fees do not reflect the deduction of our investment management fees. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Net returns have been calculated by reducing the monthly gross returns by a model fee equal to the highest stated ADV fee for the strategy. The investment management fee schedule for the Intermediate strategy is 0.35% on the first $50 million, 0.30% on amounts from $50 to $150 million and 0.25% on amounts over $150 million. Net returns have been calculated by reducing the monthly gross returns by the twelfth root of the highest stated ADV fee of 0.35%. Investment management fees are described in Part 2A of the Firm's Form ADV. Individual client returns will be reduced by investment management fees and other expenses that the account may incur. Fees have a compounding effect on cumulative results. Actual investment management fees incurred by clients may vary.

General Disclosures

This document is intended for institutional investor, qualified professional investor and financial professional use only. Not suitable for use with general retail public.

This document has been prepared by MetLife Investment Management, LLC (formerly, MetLife Investment Advisors, LLC), a U.S. Securities Exchange Commission-registered investment adviser. MetLife Investment Management, LLC is a subsidiary of MetLife, Inc. and part of MIM.[1] Registration with the SEC does not imply a certain level of skill or that the SEC has endorsed the investment adviser.

This document is not directed at persons in any other jurisdiction where the access to the information may be contrary to applicable law or regulation.
